Adding Value Through Information

Navigator Business Plan Edition

Most lenders will not consider a loan application without a solid business plan. Create your own business plan with secure, online access for multiple authors, step-by-step instructions, sample outlines, and feedback from a professional ISBDC advisor.

Market Research Reports

Researching local market demographics can give your business insight on consumer buying behavior. The ISBDC can provide your business with access to the same demographic profiles large corporations use when making marketing and relocation decisions. Grow your business with an accurate view of your market.

Develop Prospect and Competitor Lists

How do you identify competitors or develop a B2B prospect list? Thumbing through the yellow pages? Searching the Internet? With our help, there is a better way. The ISBDC uses leading company directory databases to help you develop the contact lists your company needs.

Researching Your Industry

The ISBDC has access to many nationally recognized market research databases. Let us help you locate accurate and relevant industry information. Learn what you need to know; including market trends, best practices, current market conditions, industry leaders, and upcoming industry-specific technology.

Financial Understanding and Growing Your Bottom Line

Most entrepreneurs focus on growing their business through product development and increasing sales. It's easy to lose sight of internal processes and how low efficiency can be wasting more money than one might think. The ISBDC can provide you with a comprehensive evaluation of your company's current financial position. Each report includes industry specific performance ratios and benchmark data, a liquidity study to evaluate your company's ability to meet financial obligations, a profits and profit margin report, a sales trends assessment, a borrowing report to see if your company is borrowing profitably, a comprehensive assets anaylsis to verify that your company is using its fixed assets as effectively as possible, and an employees report to see who's effective and where there is room for improvement.

Mystery Shopper Program

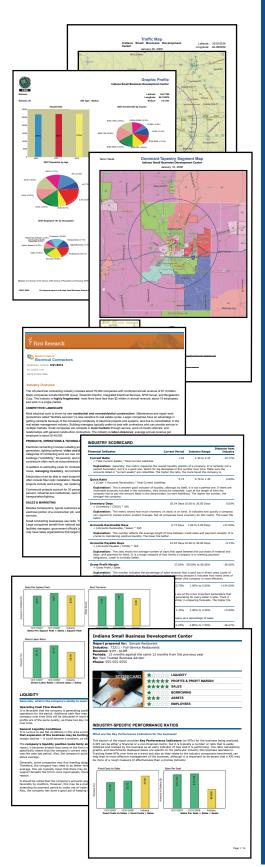

ISBDC secret shoppers will objectively measure customer service, quality, price, and the total shopping experience over the phone, online, and/or in person.

Collegiate Management Program

Free and confidential advice from a professor-guided team of college students who learn your company's goals and challenges and formally present strategic solutions.

And Much More

The ISBDC resources do not end here. Complete an ISBDC online assessment to connect with an ISBDC Business Advisor and start tapping into all of these powerful resources.

How to Start Working with Your ISBDC

Grow Your Business. Bigger.

Free, confidential, one-on-one business assistance is available for all Indiana entrepreneurs. Follow this simple process to access the ISBDC's resources:

Your Local ISBDC Office Will Create Your Customized Work Plan

Our Business Advisors meet with over 3,000 entrepreneurs a year. We require many clients in business for less than one year to attend an ISBDC business overview workshop before tapping into ISBDC consulting resources. Because most of our funding comes through tax revenues, we have the responsibility to maximize every dollar. By having a "first-step" requirement, we demonstrate to taxpayers that the business owners we work with have a commitment to education and growing their business.
